Processo MVP

- Configurar arquivo .env
- php artisan make:model minhaModel -m

```
$table->increments('id');
    $table->string('name', 30);
    $table->text('description')->nullable();
    $table->timestamps();
    $table->softDeletes();
```

- php artisan migrate
- Route::resource('rota','MeuController');
- Editar atributos protegidos da model

```
protected $fillable = ['name','description'];
  protected $guarded = ['id'];
  protected $table = 'produtos';
```

- php artisan make:controller MeuController --resource
- Instanciar model no controller use App\MinhaModel

```
index() -> $consulta = MinhaModel::all();
    return view('minhaView', compact('consulta'));
store() -> $consulta = new minhaModel;
    $consulta->name = $request->name;
    $consulta->description = $request->description;
    $consulta->save();
    return redirect()->route('rota.index')->with('message', 'Dados enviados para o sistema');
create() -> return view('criarView');
edit() ->  $consulta = minhaModel::FindOrFail($id);
    return view('editarView', compact('consulta'));
update() -> $consulta = minhaModel::FindOrFail($id);
    $consulta->name = $request->name;
    $consulta->description = $request->description;
    $consulta->save();
    return redirect()->route('rota.index')->with('message', 'Dados enviados para o sistema');
destroy() -> $consulta = minhaModel::FindOrFail($id);
    $consulta->delete();
    return redirect()->route('rota.index')->with('message', 'Dados enviados para o sistema');
```

- Criar as views e passar o foreach com devidos formulários

Read:

```
<a href="rota/create"> <button>Adcionar novo</button></a>
<hr>
@foreach($consulta as $consulta)
{{$consulta->name}} -- {{$consulta->description}}
<a href="{{route('rota.edit', $consulta->id)}}">Editar</a>
<form action="{{ route('rota.destroy',$consulta->id) }}" method="POST">
    @csrf
```

```
    @method('DELETE')
    <button>Apagar</button>
</form>
<br>
@endforeach
```

Create

```
<form method="post" action="{{route('rota.store')}}" enctype="multipart/form-data">
    {{ csrf_field() }}
    <input type="text" name="name" placeholder="nome">
    <input type="text" name="description" placeholder="description">
    <button type="submit">
    Cadastrar
    </button>
</form>
```

Update

```
<form method="post" action="{{route('rota.update', $consulta->id)}}" enctype="multipart/form-data">
    {!! method_field('put') !!}
    {{ csrf_field() }}
    <input type="text" name="name" value="{{$consulta->name}}">
  <input type="text" name="description" value="{{$consulta->description}}">
    <button type="submit">
    Cadastrar
    </button>
</form>
```
